

Thermostatic radiator valve Tuya Smart Wi-Fi

Marka: **ORNO Home** | Symbol: **OR-SH-17701** | Ean: **5908254844454**

PRODUCT DESCRIPTION

The Tuya Smart thermostatic radiator valve with LED display is a modern device that allows precise regulation of temperature in a room by suppressing the flow of hot water by the radiator. This mechanism allows to effectively control the amount of heat emitted by the radiator to maintain the optimal temperature in the room where it is installed.

Thanks to advanced smart technology, the valve allows to remotely control the room temperature from

anywhere in the world as it may be connected with the Tuya Smart app with the help of Wi-Fi. This is a popular platform that, thanks to advanced configuration with various devices, allows to create a smart and, above all, fully secure home. The app simply needs to be installed on a smartphone that supports Android and iOS, and then paired with the thermostatic valve. One may control the device with the help of smart feature or using a traditional dial.

The M30x1.5 thread connection allows easy installation of the thermostatic valve with the heating system (i.e. radiators and heating systems), providing precise temperature control in each room.

The timer allows to customize the head's schedule, which provides energy-saving and comfortable operation.

The thermostatic valve is equipped with an electric motor and a programme clock. This means that the device has the ability to adapt to changing atmospheric conditions, and the clock makes it possible to intelligently adjust thermal settings according to external conditions, which contributes to energy savings and comfort of use.

The device is powered by three AA batteries. White colour. The dimensions measure 55x102 mm.

TECHNICAL DATA

General information:

Connection to valve:	M30 x 1.5
Model:	Prosty
Suitable for radiator:	Tak
Suitable for heating:	Tak
Suitable for cooling:	Tak
Adjustment element:	Silnik elektryczny
Hysteresis [K]:	+/- 5,5
Operation by app:	Tak
Programme clock:	Tak
Colour:	Biały
Powered by TUYA:	Tak
Wi-Fi:	Tak
Wi-Fi frequency [GHz]:	2.4

Google:	Tak
Alexa:	Tak
Wi-Fi Standard:	802.11a/b/g/n
Operating Temperature [°C]:	(-13 +50)
Wi-Fi transmitter power [μA]:	< 100
Battery:	3xAA
Runing noise [dB(A)]:	36
Length [mm]:	55
Width [mm]:	60
Height [mm]:	102
Weight [g]:	240
Display:	LED
